

“Attention is valuable because it’s not just an act of focusing your mind on a single point, it is the bringing of your very essence, your soul—the most valuable thing you have—fully into the moment, to perceive with clarity. When used properly, attention is life promoting and soul revealing, and it leads to conscious evolution.”

Leap of Perception

The Transforming Power of Your Attention

Foreword by **Martha Beck**,
Best-selling author of *Finding Your Way in A Wild New World*

**What is the perception of the future?
And how do we get there now?**

PENNEY PEIRCE is a well-respected international expert on intuition and perception, and the author of several pioneering guidebooks on consciousness development. *Leap of Perception* (Beyond Words/Atria Books, 2013, \$25), is the final book in Peirce’s Transformation Trilogy that includes *The Intuitive Way* and *Frequency*—which have been translated into more than twenty languages.

Attention Has Never Been More Important!

We are in the midst of a global transformation of consciousness; the Information Age is speeding toward a “leap” into the Intuition Age. The resulting new reality will operate by different rules and we will know ourselves as a new kind of human being. We’ll live in a world that’s functioning entirely in the present moment, close to the speed of light.

Leap of Perception describes how perception is shifting from one fundamental pattern to an entirely new one. “Old” linear perception is changing to “new” spherical-holographic perception—and this transforms everything we know.

In this time of shallow, fragmented attention, distraction, and “attention deficit,” it is only through new, conscious “attention skills” that we will enter and live successfully in the Intuition Age. These skills include: direct knowing, undivided attention, flow attention, unified field attention, collective-self attention, and working purposefully with the imaginal realm to materialize new realities.

A comprehensive, hands-on guidebook, *Leap of Perception* provides down-to-earth examples and simple exercises so readers can move beyond frustration to thrive in a world of rapidly expanding possibilities. They will learn to:

- ease and accelerate the personal transformation process
- work effectively with ultrasensitivity and empathy
- shift their underlying “geometry of perception” from an old linear model to a new spherical-holographic way of knowing
- change the relationship between the left and right brain, and use more than the brain to perceive
- use the power of attention—not intention—to materialize realities
- recognize possibilities for a new reality that haven’t yet been imagined

The result of our leap of perception will be “new human” abilities that aren’t considered supernatural, and an understanding of multidimensional life, where death as we know it no longer exists, and there is no “other side.”
